

Pedro Azevedo Minutentag

pedro.azvm@gmail.com
55 11 976593112
São Paulo - Brazil

Summary

Software developer focused on back-end development, both cloud and on-premise. Worked maintaining existing systems and developing new software.

Enjoys working with .NET technologies (.NET Framework / Core / ASP.NET / .NET 5).

Professional experience with other technologies such as Java, C++, Python, NodeJs. Uses Angular for front-end development.

Comfortable designing and developing cloud based applications for the most part on azure.

Experience

Software Developer

Capgemini - RDI Software
04/2019 - Present

Currently working on the **McDonalds** account with multiple squads from **different countries**.

Worked on multiple projects:

- Supported legacy codebase (C++ / Java) and integrated it into current microservices architecture (.NET Framework).
- Created a cloud base applications on a **microservice** architecture using **ASP.NET Core** and hosted it on **azure**. Worked on the design, application implementation and cloud environment.
- **Current:** Transformation project to migrate legacy components to new architecture using **open source projects**, **.NET 5** and **docker**.

Jr. Software Developer

Jive Investments
01/2019 - 04/2019

Worked in an asset management firm, creating data mining process with **Python** and managing a **SQL Server** database. Introduced software development processes and helped design a **cloud** based architecture using **AWS**.

Game Developer

Bridge Games
07/2018 - 12/2018

Worked in a small startup developing games using **Unity3D**. Worked close to the users and wrote various **C#** tools.

Internship

B3
01/2016 - 07/2017

Worked in the department of credit analysis alongside statisticians and economists developing software for **data analysis**. Created systems using **R** and **Shiny**.
